

MADHAV MERUVA

Backend Engineer | Scalable APIs

Hyderabad, India | +91 7670849767 | madhavmeruva690@gmail.com

GitHub: github.com/mad674 | **LinkedIn:** linkedin.com/in/madhavmeruva690 | **LeetCode:** leetcode.com/123mad

SUMMARY

Computer Science undergraduate specializing in **backend engineering and scalable application** development, with hands-on experience building **REST APIs, backend services**, and real-time systems. Improved API performance by **~30%** through **Redis caching, pagination, and optimization** techniques. Experienced in designing **modular** architectures, database-driven applications, and production-ready backend systems using Java, Python, Node.js, and FastAPI. Seeking Backend / Software Engineering internship opportunities.

EDUCATION

Keshav Memorial Institute of Technology (KMIT)

Bachelor of Technology, Computer Science Engineering | 2023 - 2027 | CGPA - 8.5

PROJECTS

Startup Idea Validator (Scalable Backend Platform) | **GitHub:** github.com/mad674/startupideavalidator

- Designed and deployed **scalable backend services** for a real-time AI evaluation platform **using FastAPI and Express.js**.
- Improved API response time by **~30%** using **Redis caching, idempotent APIs, and pagination** strategies.
- Built modular REST APIs integrating FastAPI, Express.js, MongoDB, and vector search services.
- Implemented **JWT-based authentication** and scalable service architecture for concurrent user interactions.

Technologies: React.js, Node.js (Express), FastAPI, MongoDB, PineconeDB, Redis, LangChain, OpenAI API, JWT

Financial Question Answering System (FinQA) | **GitHub:** github.com/mad674/qa

- Engineered backend **inference APIs** for a **financial question-answering** platform using FastAPI.
- Developed modular **preprocessing, training, and inference** workflows for scalable ML integration.
- Built **API-driven** pipelines supporting real-time financial query processing.

Technologies: Flutter, FastAPI, PyTorch, Firebase

Jewellery Design Pattern Generator (Pix2Pix GAN) | **GitHub:** github.com/mad674/mlmodel

- Developed backend services supporting real-time **sketch-to-image** generation workflows.
- Developed a **real-time pipeline for generating design previews** from user-uploaded sketches.
- Improved output quality through **dataset preprocessing** and training optimization techniques.

Technologies: React.js, Node.js (Express), JWT, MongoDB, TensorFlow, Flask

SKILLS

- Languages:** Java, Python, JavaScript
- Backend:** Node.js (Express), FastAPI, REST APIs, JWT Authentication
- Databases:** MongoDB, MySQL, Vector Databases, Redis
- Cloud & DevOps:** Git, Postman, AWS, Docker
- Core Concepts:** DSA, OOP, OS, DBMS, Computer Networks
- AI/ML:** PyTorch, TensorFlow, NLP, LangChain

ACHIEVEMENTS AND CERTIFICATES

- Solved **500+ DSA** problems with consistent practice in problem solving, algorithms, and data structures.
- Secured a **top team award** at the KMIT Project Expo
